4.3	Syed Ahmed Subzwari	4
4.4	Basil Saeed	4

1 UI Design

Prototypes of the initial user interfaces were made using Figma.

The prototypes were made to plan the structure of the content, so the color and “presentation” of the pages were changed, as we made better designs and colors in the actual implementation.

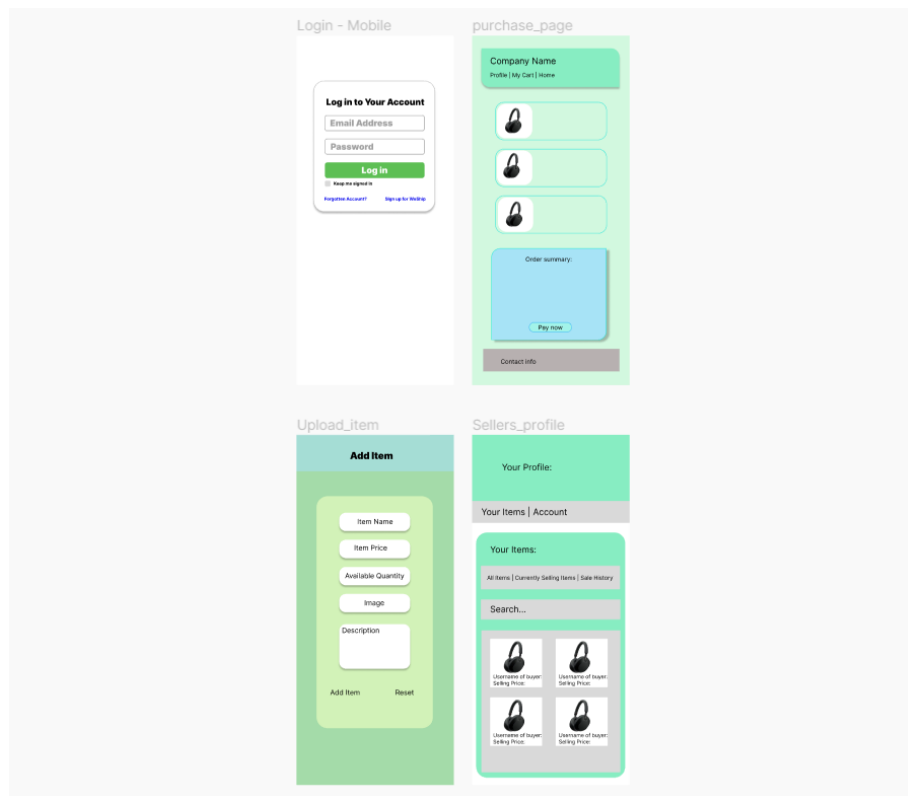

Figure 1: Figma Prototype

2 Application Design

This section will show the UML Class Diagram for the backend of the application.
